

AccuPick – SmartPack Intelligent Packaging Solution

- Robotize multi-SKU packaging
- Save on dimensional weight
- Go green, reduce packaging materials
- Improve social distancing in the warehouse

Intelligent Packaging Solution

Solomon AccuPick SmartPack represents the state-of-the-art robotic pick-and-place packaging solution.

Powered by advanced AI and 3D vision, SmartPack ensures boxes/bins are filled optimally for various types of packaging applications. Beyond automating a traditionally manual task, SmartPack generates a superior return on investment by reducing the dimensional weight of the packages, lowering both shipping costs and the amount of packaging materials used.

SOLOMON
Vision with Intelligence

Human-like vision to locate diverse objects

Vision controlled grippers to ensure the smooth handling of different objects

Fast dimensioning and precise placement of the objects in a box

Award-winning UI with seamless integration with all major robot brands
